

GO annotation enrichment of undetected proteins

6209 translated orf sequences
from the fasta database

- regulation of transcription, DNA-dependent
- transmembrane transport
- drug transport

GO annotation enrichment of proteins in the PeptideAtlas

- oxidation-reduction process
- cellular response to drug
- pathogenesis
- hyphal growth
- translation
- fungal-type cell wall organization
- cellular response to oxidative stress
- protein folding
- ER to Golgi vesicle-mediated transport
- rRNA processing
